DURAPLAS[®]

Custom Printed Bags
for Food Manufacturers

WELCOME

UPAC specialises in the design, development, and production of customised bags for the food industry. UPAC offers world-class facilities and Australian manufacturing to extrude, and print based on specific technical needs, efficiencies, and food safety standards with over 40 years of experience in custom bag manufacture in Australia.

The DURAPLAS® range of LDPE polythene bags are manufactured to meet the highest standard of food safety. As DURAPLAS® bags have contact with food, UPAC HACCP accreditation offers you the assurance the bags are food safe. Made from virgin food-grade plastic, they can increase the shelf life of baked or frozen products by regulating moisture and airflow around the food.

At UPAC, we take pride in our ability to provide innovative packaging solutions... Along with your team, UPAC will work hand in hand to bring any packaging vision to life. We believe that no option is impossible. Whether it be thickness, length, punching, wickets, and Gravure CMYK print, whatever obstacles you may face, UPAC will be there with a solution.

At UPAC, we conduct comprehensive quality checks to ensure that no detail or specification is overlooked, giving your team peace of mind throughout the entire project.

UPAC offers Food manufacturers a selection of choices from both low-density polyethylene (LDPE) and polypropylene (PP) bags to suit their application. DURAPLAS food-safe bags are made from Virgin food-safe material and contain no bisphenol A (BPA), phthalates, or epoxidised soybean oil (ESBO).

DURAPLAS[®] Bag Options

Cussets, side, or bottom

Thickness, from the thinnest HDPE to very heavy grade LLDPE

Print, from 1 to 12 colour Flexographic print, or up to full 8 colour gravure CMYK

UPAC is selected throughout the food manufacturing industry as its trusted packaging supplier because at UPAC we understand and adhere to the same rigorous safety standards as our clients do.

UPAC believes that consistency & communication are paramount to any working relationship, through this we can ensure our clients are kept up to date in real time and that you are never left in the dark. This enables you to focus on providing the very best in food production knowing that the plastic bags you use are safe for your product and the consumer.

DURAPLAS Printed Bag Features

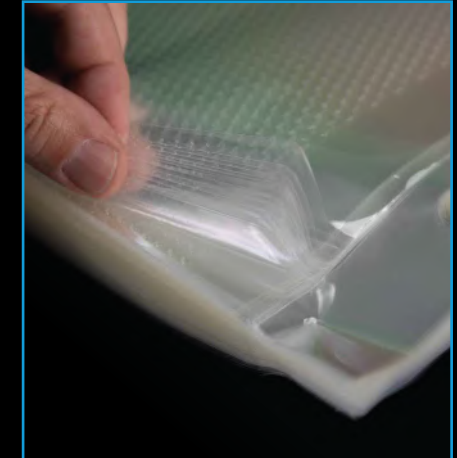

UPAC is a company that specialises in providing food-safe solutions for the food and beverage industry. Our bags are certified safe for food contact and are produced and stored in facilities that have implemented a HACCP plan and are audited regularly to ensure compliance with food safety regulations. This rigorous certification process and strict adherence to food safety guidelines ensure that UPAC's bags meet strict safety standards. Customers can trust that their products are safe for food storage and transportation.

Wire wickets and coloured grommets are important components in the food industry, and their high quality is essential for maintaining food safety. Designed specifically for food-safe environments, these components are manufactured with high-quality materials and attention to detail to ensure they are safe for use with food products. The coloured grommets also help prevent cross-contamination and enhance food safety practices, making them an essential part of any product bagging environment.

Efficient loading is critical to the success of a food manufacturing operation. Through many years of development and testing, UPAC has increased loading efficiencies, elimination of tail-ends, reduced waste, and improved overall productivity. By identifying and addressing these strategic challenges UPAC has helped food manufacturers streamline their operations and ensure their success in a high-speed, highly competitive industry.

UPAC's commitment to food safety extends beyond its own products and services, as we recognise the importance of maintaining safe practices throughout the entire food industry. Our products, which include food-safe solutions such as bread bags, ice bags, carton liners, wire wickets, and coloured grommets, are used by a variety of businesses and industries involved in food production and handling. By providing high-quality, food-safe solutions, UPAC is helping to ensure the safety and integrity of the food products that millions of people consume each day.

VENDURA Smart Inventory Efficiency System (Safeguard your inventory)

Enabling Australian Manufacturers to GROW Through Managed Inventory.

With the inventory management program, VENDURA, UPAC manages the complete supply, packaging, and warehousing for an ongoing supply of your printed bags, in HACCP-accredited facilities. Ensuring you never run out or be forced to sacrifice floor space for the stock of bulk packaging.

How it works...

The VENDURA system takes the pressure off your space, your cash flow, and your team.

Warehousing

Your bags are stock managed in a facility HACCP certified for the handling of food contact packaging.

Inventory Management

UPAC manages monthly deliveries of your forecasted volumes of each bag. Supply is guaranteed to ensure you never run short.

Delivery

Each delivery will arrive packed on pallets with labels faced forward for easy access.

DURAPLAS bags feature clear recycling symbols that help your customers make responsible recycling decisions. These symbols are easily recognizable and provide consumers with the necessary information to reduce the chances of the bags ending up in landfills.

If you are a food manufacturer with a HACCP Food Safety Program, we can offer you approved plastic bag options to help you comply with the system guidelines. Our DURAPLAS bags are packaged hygienically to prevent contamination and meet HACCP standards. Additionally, we can customise the bags to your preferred print, thickness, and dimensions upon request.
